

## LUCCI NEWSLETTER December 2014

### LUCCI Lunch Seminars:

Interested in crossover research possibilities, or just curious what other people in LUCCI are up to?

LUCCI is planning to organise internal seminars on fridays lunches once a month, covering all WPs. There will be a short presentation on a live topic, followed by questions and discussions. As it is at lunchtime, sandwiches, toppings and fruit will be served. First seminar will be on 16th of January, and first out is wp 4. More detailed information will follow by email and on website.

### R3I WORKSHOP:

#### Scientific Writing and Publishing with Impact

This workshop is formed to give participants an understanding of the principles and practice of successful scientific writing and publication and the tools to plan, write and publish scientific papers that can have an impact.

Date: 27-28 January, 2015.

If you have any questions please contact Anna Ekberg.

### Planning a post-doc

During the graduate research school ClimBEco Winter Meeting on January 20<sup>th</sup> there will be an open session for anyone interested in the road towards a successful postdoc. This session is a collaboration between ClimBEco and CEC Fellows and takes place at Elite Hotel Ideon in Lund.

### VIVI VAJDA ON NEW JOB

Vivi Vajda is the new Head of the Department of Palaeobiology at The Swedish Museum of Natural History. She will be working part time in Stockholm and part time in Lund, and will stay as a coordinator of LUCCI. Congratulations to the new job Vivi!

Vivi Vajda

### ANNUAL MEETING 20-21 AUGUST 2015

The next annual meeting is planned to the 20-21 August 2015. More information will be sent out later, but please keep these days reserved for LUCCI in your calendar.

### Hyltemossa field station up and running

The new Hyltemossa field station (lat. 56°06' N, lon. 13°25' E, 115 m asl), established this year a few kilometres south of Perstorp, in north western Skåne t is now running.

The station is part of the European project Integrated Carbon Observation System (ICOS) and run by the group of Professor Anders Lindroth. All activities are centred around a 150 m tall tower, located in a 30 years old managed Norway spruce (*Picea abies*) forest. Measurements involve energy and greenhouse gas exchange, atmospheric greenhouse gas concentration and ecosystem variables.

The infrastructure at the new field station, including a lab building and an office building, is open for researchers outside of ICOS and data will be in the future available from the ICOS Carbon portal.

For further information contact Michal Heliasz (principal investigator, [michal.heliasz@cec.lu.se](mailto:michal.heliasz@cec.lu.se)) or Tobias Biermann ([tobias.biermann@cec.lu.se](mailto:tobias.biermann@cec.lu.se)).

### A few words from resigning R3I leader Claire McKay

*Due to finishing up my PhD in the next 6 months, my time as the leader of LUCCI's R3i group has to come to an end so that I can focus solely on my thesis. I would like to thank everyone involved in this postdoc and PhD forum, it has been a pleasure organising after-work socials, workshops and excursions – so a big thank you to everyone who attended and made it all worthwhile! I think we had a lot of fruitful discussions about our research and careers as well as some deserved down-time whilst networking along the way. All the very best to all LUCCI postdocs and PhD students - especially the new representative(s) in the New Year! Cheers!*

/Claire
